Subject commit f1f585c8c5e2, scorecard 9e10e7f65d34, adapter 9210be3088f5

Strict result: FAIL (measurable metrics alone: FAIL). 8 metrics pass, 5 fail, 6 are not measurable. Failing dimensions: Verified, Bare metal, By construction, Efficiency, Velocity, Honesty. Subject commands ran only inside the sandbox (attestations are in the card).

Honesty	gates self tested	not measurable (2)	-	>= 100
Honesty	attack suite	not measurable (2)	-	== 1

Not measurable, and why. (1) the change's first authored commit is not recorded on main (rebase and squash rewrite the dates, which read 0 under direct landing). (2) not implemented in this runner version.

Notes. Libc symbols the artifact needs (5): `free`, `malloc`, `memcpy`, `memset`, `pthread_once`. The 4 hand-written tests of the subject's code and the 6 gate self-test files are listed in the card.
